# KEVIN JOSEPH KELLY

## WHO I AM

I am a Full Stack Web Developer with experience in PHP, HTML, JS, AngularJS, CSS, Redis, and MySQL. I have worked with Python, C++, Java and with Docker. I am also a graduate student at Lewis University seeking a Master's of Computer Science with a concentration in Cyber Security. I believe in security, speed, intuitive design, and test-driven development.

## EDUCATION

### **M.S. Computer Science | Lewis University**

AUGUST 2018 – DECEMBER 2020 (ANTICIPATED)

3.5 GPA thus far. My focus has been on object-oriented design patterns and practices, encryption, and version control. My thesis is about protecting consumer data.

### **B.S. Computer Science | Lewis University**

AUGUST 2016 – AUGUST 2018

I graduated Magna Cum Laude. My concentration was Cyber Security, and my capstone project was building a computer lab on campus that allows students to connect multiple virtual machines with actual networking equipment using VMWare vSphere and more specifically ESXi.

## EXPERIENCE

### **Full Stack Developer | Dealer eProcess**

JANUARY 2019 – MARCH 2020

Designing and maintaining AngularJS applications. Integrating 3<sup>rd</sup> party plugins in PHP. Designing, implementing, and testing RESTful APIs using Slim framework and Redis message broker. Designing MySQL tables that contain sensitive information such as consumer data and username/password combos.

### **Bartender | Merichkas**

MARCH 2004 – JANUARY 2019

Bartending and occasionally cooking.

## SKILLS

I'm great at explaining difficult concepts to receptive people on my team. I take the blame when something goes wrong, and I give away credit to others when it goes right. I care about everything I create, and I care about the people who help me create. I'm not satisfied until I hear, 'Wow, that is awesome.'

## ACTIVITIES

I spent 2 years training at the Second City Training Center in improvisational comedy, acting, writing, auditioning, and promotion. I am a pretty good poker player, and I enjoy cooking. My first web site was called 'The TI-85 Experience' and it was online in the early 90s.
